Notes:

- Please make sure the previous release (bdi-mf-cr-sid-creation-v20260729-001) already deployed successfully.
- Encrypted private key. Put the key in /home/avantradeapps/files/PPK_Key then adjust the system parameter category "ONLINE_CUSTOMER_UPLOAD" with param ID "PRIVATE_KEY_PATH" value to point to the new private key file.
- Fixed error on upload risk profile update approval due to multiple active questionnaires.
- Fixed empty "riskProfile" on MF Profile View API due to invalid questionnaire ID set in MST_CUSTOMERS.
- Fixed customer static data upoad report query. Separate CIF row if the file name is different.
